

Project Case Study *Easy Windows*

Balgowlah Heights, NSW
Completed 2021

Project Type:

Single house, new build project

Window Styles:

Tilt & Turn, Bi-Fold doors

Window Quantity:

21 units

Window Finish:

Turner Oak Malt out/White in

For this beautiful, modern home in Balgowlah Heights the client was determined to have the best-performing windows and doors with as little impact on the surrounding natural environment as possible. The clear solution was uPVC frames, with their superior energy efficiency, noise reduction and thermal qualities meeting all of the client's wishes.

Sydney-based fabricator Easy Windows' specialty uPVC double-glazed windows and doors offer a durable and energy efficient option, ensuring that excellent thermal insulation is experienced throughout the house year-round. The dual-colour profile finish from Aluplast also adds versatility to the design, giving a sleek indoor style with a warm and charming exterior.

As well as their excellent thermal qualities, the durability and low maintenance of uPCV window frames have long made them the most popular window choice across Europe and the US, with an ever-increasing focus on energy efficiency in new homes leading to a rapidly growing rise in popularity in Australia over recent years. PROFILE ACCREDITATION
FOR WINDOWS AND DOORS

For this build, all windows and doors were completely custom-made in consultation with the client to fit with the classic European-style concept and design of the house. The dual-colour uPVC profiles provided the additional benefit of having the windows blend in with both the exterior and interior style of the property. The completed house has all the benefits of comfort and sustainability, with the double-glazed uPVC windows and doors offering outstanding thermal performance and insulative qualities.

Uw value: 1.7 W/m²K

Solar Heat Gain Coefficient: 0.4

Paul Carrick & Associates

Easy Windows have been manufacturing uPVC windows and doors on Sydney's Northern Beaches since 2004. They use Aluplast uPVC profiles made in Germany, which are assembled in their Sydney factory using glass from local suppliers. As a family business, Easy Windows are proud to bring quality European uPVC windows and doors to Sydney to provide excellent energy efficient and quality design options.
